## **AGE ALLOWANCE**

### **PROPOSAL**

Boats from the 1980's and older shall not have such pronounced benefits over newer boats.

### **RATIONALE**

With some specific conditions, such as over 10 knots upwind and when it is applied to Inshore Performance Line courses, boats from the 1980's and older with characteristics such as high Dynamic Allowance, Age Allowance, narrow transom, and heavy displacement, have a significant advantage over other boats.
