SPINNAKER CONFIGURATION

PROPOSAL

- a) Add article 112 (spinnaker configuration) of the 2008 Rule version back into the current Rule.
- b) Add to d): pole allowed

RATIONALE

- a) Article should not have been deleted
- b) It should be clear that a pole is always allowed on a boat measured without spinnaker (poled jib). The current ORC Manager can calculate incorrectly with and without a pole.
