## **NON-SPINNAKER RATING**

### **PROPOSAL**

Evaluate ratings of boats without spinnaker.

### **RATIONALE**

- a) The rating difference for a boat measured with and without a spinnaker seems unrealistic large, up to 8% and drives to undesirable type-forming.
- b) For boats measured without spinnaker %Non-Spinnaker ToD/ToT+ should be the equal to %Offshore ToD/ToT+which it is currently not.
