MANAGEMENT COMMITTEE

MEASUREMENT MANUAL

PROPOSAL

Define, describe and collect Rule-required measurements in an official Manual to support national rating offices and to secure commonality and quality around the world

RATIONALE

Will address the know-how problems in national rating offices, for e.g. when there are personnel changes. Will be a great support tool for new members of the ORC. Such a Manual can also address the need for documentation of special ORC Club measurement methods like the use of designer-generated offset files.
