## **OFFSET FILES DATABASE**

### **PROPOSAL**

Give priority to improve the ORC offset file database.

### **RATIONALE**

Success of ORC Club depends on the availability and accessibility of offset files. This is not easy in the current practice. For instance, there is no uniformity in class types and all files go into one bucket without quality control or quality indication. Without historic knowledge it is hard to find the correct offset file.

It is therefore proposed to develop a plan to assure that the lack of offset files does not get in the way of a prosperous ORC Club development.
