## **COOPERATION BETWEEN ORC AND RORC**

### **PROPOSAL**

SWE advocates ORC to continue cooperation between ORC and RORC in a search for a solution that will bring a rating system that promotes today's ORC and IRC boats and sailors to race in the same regattas and under the same system in the near future.

### **RATIONALE**

The Swedish Offshore Association, SHF, believe that the first combined Offshore Worlds has proven that cooperation between two rating systems is possible. It should be the intention of both organizations to find the best way to allow sailors to easily get both certificates without additional costs and measurements with the target to have a universal rating system in the near future. This should help in getting bigger participation and better competition at the championships.
