SCORING, EVENT MANAGEMENT AND TRACKING SYSTEM

PROPOSAL

Do not make specific brand race management systems mandatory.

RATIONALE

Mandating certain regatta management tools, such as a specific tracking system, may force the organizer into extra cost, extra effort and training while the benefits may be questionable. The system mandated by ORC might be fully unknown by the organizer while he has years of experience with another good system. Trust the organizer. It's the task of ORC to have clear requirements including their data needs and the task of the organizer to prove that their choice meets these needs.

Therefore it is proposed to remove the mandatory requirement for ORC scorer (2019), the ORC event management website (2019) and Trac Trac (2020).
