GUIDELINES FOR MANAGEMENT OF ORC-SCORED REGATTAS

PROPOSAL

There is a need for Guidelines for the management of ORC-scored regattas with information about best practices.

RATIONALE

Many Race Officers with good skills in one-design class regattas still do not too fully recognize nor know how to address problems during regattas using the ORC rating system. All questions for ORC rating rules are developed and described on the ORC web page and the VPP documentation, but there is no Guidance on how the rules should be used during regattas. Race managers need more training on the use of the ORC rating system.
